Notes to the Consolidated Financial Statements

### **1. NATURE OF OPERATIONS AND GOING CONCERN**

Kingfisher Metals Corp. (the "Company" or "Kingfisher") was incorporated under the Business Corporations Act (British Columbia) on September 7, 2017, as a Capital Pool Corporation defined in the Policy 2.4 of the TSX Venture Exchange (the "TSX-V"). The principal business of the Company was the identification and evaluation of assets or businesses with a view to completing a Qualifying Transaction ("QT"). The Company's head office is located at 1710-1050 W. Pender Street, Vancouver, BC, V6E 3S7.

On March 12, 2021, the Company completed the share exchange transaction with Kingfisher Resources Ltd. ("KFR") which constituted the Company's QT. KFR was incorporated under the Business Corporations Act (British Columbia) on January 21, 2019 and its principal business focus is the exploration and development of mineral prospects in Canada. Upon completion of the QT, the Company began trading under its new name on the TSX-V with the symbol "KFR" (and shortly thereafter on the Frankfurt Stock Exchange under the symbol "970"). The Company announced on August 25, 2021, that it commenced trading on the OTCQB Venture Market in the United States under the symbol "KGFMF."

On April 8, 2024, the Company underwent a five-for-one share consolidation of its issued and outstanding common shares. All share figures in these consolidated financial statements are shown as post-consolidated shares.

These condensed consolidated interim financial statements have been prepared in accordance with IFRS Accounting Standards ("IFRS") applicable to a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. There is no assurance that the exploration activities of Kingfisher will result in future profitable operations. The business is subject to risk, market conditions, supply and demand, and competition. The Company currently has cash available to meet its administrative overhead and maintain its assets. The recoverability of amounts shown in assets is dependent on several factors. These factors include the ability of the Company to obtain financing to complete the planned exploration, and future cashflow from the Company's business.

The Company has sufficient cash to fund its current administrative obligations and planned 2026 exploration program. However, the Company has not generated revenue from operations and will require additional financing in the future to fund exploration activities beyond its current planned programs, maintain its mineral property interests, and meet ongoing working capital requirements. The Company's ability to continue as a going concern beyond its current funding horizon is dependent on its ability to obtain additional financing, realize value from its mineral properties, or otherwise generate future cash flows.

These condensed consolidated interim financial statements do not include any adjustments to the amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations.

### **2. MATERIAL ACCOUNTING POLICY INFORMATION**

#### **(a) Statement of compliance of basis of presentation**

These condensed consolidated interim financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. These condensed consolidated interim financial statements should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2025, which have been prepared in accordance with IFRS issued by the IASB.

## KINGFISHER METALS CORP.

For the three months ended March 31, 2026

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars)

---

The accounting policies applied by the Company in the condensed consolidated interim financial statements are the same as those applied by the Company in its most recent annual financial statements for the year ended December 31, 2025.

### (b) Significant accounting judgments, estimates and assumptions

The preparation of the Company's consolidated financial statements is in conformity with IFRS, which requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Significant assumptions about the future and other sources of uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

#### *Exploration and evaluation assets*

The application of the Company's accounting policies for exploration and evaluation assets requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions may change if new information becomes available. If, after expenditures are capitalized, information becomes available suggesting that the recovery of the expenditures is unlikely, the amount capitalized is impaired with a corresponding charge to profit or loss in the period in which the new information becomes available.

#### *Going concern*

Critical judgement and estimates are applied for the determination that the Company will continue as a going concern for the next year.

### (c) Basis of consolidation

These consolidated financial statements include the accounts of the Company and its wholly owned and controlled entity. Control is achieved when the Company has the power to govern the financial operating policies of an entity so as to obtain benefits from its activities.

Intercompany balances and transactions including any unrealized income and expenses arising from intercompany transactions are eliminated upon consolidation.

The following subsidiary has been consolidated from all dates presented within these consolidated financial statements:

Name of Subsidiary	Place of Incorporation	Principal Activity	Ownership Interest
Kingfisher Resources Ltd.	Canada	Mineral Exploration and Evaluation	100%

### **8. FINANCIAL INSTRUMENTS RISK**

The Company's financial instruments are exposed to the following risks:

#### *Credit Risk*

Credit risk is the risk of financial loss to the Company if counterparties do not fulfill their contractual obligations.

Cash and cash equivalents consist of cash bank balances. There are no short-term investments currently.

The carrying amount of accounts receivable and cash and cash equivalents represents the maximum credit exposure. The Company does not have an allowance for doubtful accounts. As at March 31, 2026, there were no significant amounts past due or impaired.

#### *Market Risk*

Market risk is the risk that changes in foreign exchange rates and interest rates will affect the Company's cash flows, net income and comprehensive income. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

#### *Liquidity Risk*

Liquidity risk is the risk that the Company will not be able to meet its purchases and capital commitments, and other financial obligations as they are due. The Company's approach to managing liquidity is to ensure, to the extent possible, that it will have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking harm to the Company's reputation.

#### *Foreign Exchange Risk*

The Company currently does not have significant exposure to other currencies, and this is not expected to change in the foreseeable future as the capital commitments that are expected to be carried out in United States dollars will be limited.

#### *Interest Rate Risk*

The Company is exposed to interest rate risk on its cash and cash equivalents. The majority of these deposits have been in discounted instruments with pre-determined fixed yields. Interest rate movements will affect the fair value of these instruments, so the Company manages maturity dates of these instruments to match cash flow needs, enabling realization at no loss in almost all cases.

#### *Fair Value of Financial Instruments*

The fair value of the Company's financial assets and liabilities approximates the carrying amount. Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

During the three months period ended March 31, 2026 and the year ended December 31, 2025, there were no transfers between level 1, 2 and 3 classified assets and liabilities.

### **9. CAPITAL MANAGEMENT**

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support future exploration and maintaining investor, creditor and market confidence.

The Company defines its capital as shareholders' equity and working capital. The Board of Directors does not establish a quantitative return on capital criteria for management but rather relies on the expertise of the Company's management to sustain future development of the business. In the event that adjustments to the capital structure are required, the Company may consider issuing additional equity, raising debt or revising its capital investment programs.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital requirements or restrictions. The Company has not paid or declared any dividends since the date of incorporation, nor are any contemplated. The Company may require equity issues to cover administrative and operating cost.

### **10. LIABILITY AND INCOME TAX EFFECT ON FLOW-THROUGH SHARES**

Funds raised through the issuance of flow-through shares are expected to be expended on qualified Canadian mineral exploration expenditures, as defined pursuant to Canadian income tax legislation. The flow-through gross proceeds less the qualified expenditures made to date represent the funds received from flow-through share issuances that have not been spent and are held by the Company for such expenditures.

On June 3, 2025, the Company closed a brokered private placement and issued 21,302,500 flow-through units ("Premium FT Units") at \$0.415 per Premium FT Unit.
